

Reflect on  
the day

A large, billowing white cumulus cloud dominates the left side of the frame, rising from the bottom left towards the top center. The cloud has a textured, puffy appearance with various shades of white and light blue. The background is a clear, vibrant blue sky. On the right side, the text 'THE SKY'S THE LIMIT' is written in a white, hand-drawn, sans-serif font, arranged in four lines.

THE  
SKY'S  
THE  
LIMIT

# Some other things you can do with a Raspberry Pi

- Measure temperature
- Measure distance
- Detect motion
- Tweet (with pictures)
- Detect hashtags in tweets
- Send emails (with attachments)
- Send SMSes
- Open and close a castle drawbridge
- Run a database
- Run a webserver
- Transmit a radio station
- Real-time Computer Vision (OpenCV)
- Weather balloon telemetry controller (Pi in the sky)
- Time lapse photography / slow motion video at high frame rate
